On This Volume

This volume (DOI 10.5281/zenodo.22723037) prints what the Reading Edition of *Ethical Ontology, Volume I* (DOI 10.5281/zenodo.22723038) set aside: the freeze and status headers each chapter carried in the first edition (DOI 10.5281/zenodo.21721619), the editorial brackets left in its notes, the sentences and clauses that certified results against the research instruments of the volume's production, and the certification record of the Conclusion. Everything is printed verbatim, under the chapter and section it came from. The change list at the end names every removal, every substitution and every join, with the original and the replacement, so that the Reading Edition can be reconstructed from the first edition and this volume by string match, and audited the same way.

Two conventions. A **join** is the minimum deletion that lets a sentence read after a removal; no join in this edition alters, adds or reorders a word. A **move** is a sentence or paragraph transferred whole. The doctrinal register ([F] [R] [H] [O]), the evidence statuses ([S] [S?] [C] [O-E]) and the chapters' closing ledgers are not apparatus and were not moved; they are the book's own method, and remain in the Reading Edition.

CONTENTS

Part headings	1
Chapter 1 – The Transparency of the Who	3
Chapter 2 – The Failure of Substitution as Disclosure	5
Chapter 3 – Access, Not Construction	7
Chapter 4 – Against the Clearing: The Opening Is in the “This”	9

Change List	79

Part headings

The eight Part headings (source lines 80, 538, 931, 1523, 1882, 2639, 3277, 4340) are verbatim in the Reading Edition and carry no apparatus. One status line stands under a Part heading rather than inside a chapter, and is moved here.

Part V — Time, Interruption, and Perimetralisation (source line 1884)

Status: FINAL FREEZE — research-certified against *Ethical Ontology, Volume I — Research Dossier v22*, including the governing post-closure correction on the other's death.

Chapter 1 — The Transparency of the Who

Nothing was moved from this unit; no apparatus extracted.

Chapter 2 – The Failure of Substitution as Disclosure

Key: Volume I, Chapter 2. Nothing was moved from the body of this chapter; all apparatus extracted from it sits in the notes.

Notes

[^c2.4]

[verification targets to be fixed at source review; the body remains phenomenological]

[^c2.5]

[verification targets to be fixed at source review]

Chapter 3 — Access, Not Construction

Nothing was moved from this unit; no apparatus extracted.

Chapter 4 — Against the Clearing: The Opening Is in the “This”

Nothing was moved from this unit; no apparatus extracted.

Chapter 5 — Coincidence and Deictic Determination

Nothing was moved from this unit; no apparatus extracted.

Chapter 6 — The Who Is Not the Locus

Nothing was moved from this unit; no apparatus extracted.

Chapter 7 — Who as Modal Coincidence: Hinge, Not Summit

Nothing was moved from this unit; no apparatus extracted.

Chapter 8 — The How of Being: Adverb, Not Item

Notes

[^c8.3]

[verify page loci against the cited editions]

[^c8.4]

[Rayo and Yablo: work not yet named — open]

Chapter 9 – The Common Without a Bearer: Carried, Not Stored

Nothing was moved from this unit; no apparatus extracted.

9.8 The Ledger, and the Border Ahead

Removed by join (flag 1a): the sentence read “– ratified in the closed research programme and realised in this chapter’s prose;” and now reads “– realised in this chapter’s prose;”.

9.8 The Ledger, and the Border Ahead

Removed by join (flag 1b): the sentence read “– likewise research-ratified and here manuscript-earned,” and now reads “– here manuscript-earned,”.

Chapter 10 — Modulation, Modalisation, and Freedom

Nothing was moved from this unit; no apparatus extracted.

10.9 The Ledger, and Part III Closed

Removed by join (flag 2): the sentence read “as presently disclosed — closed-research-ratified and here realised; and” and now reads “as presently disclosed; and”.

Chapter 11 — The Category That Cannot Be Stated Without Pointing

Nothing was moved from this unit; no apparatus extracted.

Chapter 12 — Categorially Singular, Not Self-Grounding

Nothing was moved from this unit; no apparatus extracted.

12.8 The Ledger, and the Three Confusions

Removed by join (flag 6): the sentence read “The definition: **[F]**; revision-ratified, manuscript execution completed in this chapter.” and now reads “The definition: **[F]**.”.

Chapter 13 — Whose? / In What Way? / For What Answer?

Nothing was moved from this unit; no apparatus extracted.

Chapter 14 – The Dissolution of Sameness: Nessuno and Ognuno

Nothing was moved from this unit; no apparatus extracted.

Chapter 15 — Inception: The Coincidence Begins

Nothing was moved from this unit; no apparatus extracted.

Chapter 16 — Standing, Occurrent Access, and the Possible

Header

Status: Verified revision — sources and footnotes completed;
ready for freeze audit.

Chapter 17 — The Other’s Death: Interruption, Perimetralisation, and Inaccessible Localisation

Header

Status: Verified revision — sources and footnotes completed; ready for freeze audit.

17.7 Death, Stated

Removed by join (flag 12): the sentence read “said otherwise, it is the retired vocabulary and the audit removes it.” and now reads “said otherwise, it is the retired vocabulary.”.

17.8 The Ledger, and What the Perimeter Leaves Standing

Regional entry manuscript-executed here and research-certified at Part V freeze against Research Dossier v22: the governing post-closure correction confirms mediated access through the other’s living presence, inaccessible localisation, loss of the living access-condition at death, and the possibility-not-impossibility rule.

Chapter 18 — Two Permanences: Indelible Having-Been and the Manner That May Recur

Header

Status: Draft V3 — authorially revised and source-verified; ready for final freeze audit.

18.8 The Ledger, and the Need Ahead

Research-certified at Part V freeze against Research Dossier v22: the corrected conditional non-restoration axiom is explicitly grounded in irreversible interruption and definitive perimetralisation, while remaining a conditional analytic consequence rather than a proof of singularity.

18.8 The Ledger, and the Need Ahead

Proposed regional entries, manuscript-executed here, pending packet confirmation at freeze.

Chapter 19 — The Need We Cannot Meet: Presence, Mourning, and the Lost Key

Header

Status: Part V audit revision — internally verified; provenance certification remains conditional on the unavailable Part V research packet.

19.8 Closing Part V

Removed by join (flag 20): the sentence read “**Thesis 14, manuscript-executed here**, with its who/locus preamble and total-loss clause: research-concordant and certified at Part V freeze against Research Dossier v22.” and now reads “**Thesis 14, manuscript-executed here**, with its who/locus preamble and total-loss clause.”.

19.8 Closing Part V

Removed by join (flag 22): the sentence read “operated on this book’s ground; manuscript-executed and research-certified at Part V freeze, with the packet confirming that traces may sustain

reference and warrant without delivering the perimetralised life or its localisation.” and now reads “operated on this book’s ground; manuscript-executed.”.

19.8 Closing Part V

Removed by join (flag 23): the sentence read “the claimant symmetry’s first station discharged, and the three chapters’ provenance entries jointly certified against Research Dossier v22 at the Part’s freeze.” and now reads “the claimant symmetry’s first station discharged.”.

19.8 Closing Part V

The packet supports the posthumous-reference, warrant, trace-access, inaccessible-localisation, and non-restoration distinctions; the canonical itself remains manuscript-earned rather than externally derived.

Chapter 20 — The Cat at the Threshold

Header

Status: Draft V4 — research and bibliography audited under Chapter 20 Drafting Plan V2; the empirical and historical claims are certified to the limits stated in notes [^c20.16]–[^c20.19].

Scholion — Bastet: When Feline Life Enters a Cultic Configuration

Nothing was moved from this unit; no apparatus extracted.

Chapter 21 – The Infant and the Dementing

Header

Freeze status: Research-verified final freeze. Philosophical, lexical, evidential, citation, and perimeter audits completed.

Chapter 22 — The Machine

Header

Status: Research-verified final freeze. External sources support the chapter’s architecture and bounded empirical descriptions; no external source supplies doctrinal provenance.

22.9 The Ledger, and the Turn to the Dead

Removed by join (flag 26): the sentence read “implements that gate with two plan-ratified refinements” and now reads “implements that gate with two refinements”.

Chapter 23 — The Dead: Perimetralised Who Without Ongoing Living Presence

Nothing was moved from this unit; no apparatus extracted.

Chapter 24 — Reading the Sacred: Six Structures That Must Not Be Collapsed

Nothing was moved from this unit; no apparatus extracted.

Scholion — The Second Tomb: When a Claim of Passage Is Kept in a Town

Nothing was moved from this unit; no apparatus extracted.

S.6 The scholion's result

Removed by join (flag 28): the sentence read “receives the anthropological and the Christological trials, with the assigned packet.” and now reads “receives the anthropological and the Christological trials.”.

24.8 Reading Without Verdict

Removed by join (flag 31): the sentence read “Held at candidate status, packet-governed, reported and stratified but not admitted” and now reads “Held at candidate status, reported and stratified but not admitted”.

Chapter 25 — Augustus, Athena, Heracles

Notes

[^c26.9]

[correction carried on the load-bearing sentence]

Chapter 26 — Christianity: The Same Who Across Non-Identical Modes

Nothing was moved from this unit; no apparatus extracted.

Chapter 27 — Theology at the Boundary

Nothing was moved from this unit; no apparatus extracted.

27.2 What the Reading Brings

Removed by join (flag 32): the sentence read “the created-routes clarification, still a packet position, still unadmitted, still riding” and now reads “the created-routes clarification, still unadmitted, still riding”.

Chapter 28 — Athena Is Still There

Nothing was moved from this unit; no apparatus extracted.

Chapter 29 — Ognuno a Modo Suo

Header

Freeze status: V4 — final freeze after doctrinal, lexical, provenance, proportion, and Chapter 28 transition-concordance audits. The §28.9.2 transition question was verified against the frozen Chapter 28 text. No open status was promoted, no new trial was added, and the finite-who postulate remains the chapter's sole normative instrument.

Chapter 30 — Freedom and Keeping

Header

Freeze status: V4 — FINAL FREEZE after doctrinal, lexical, provenance, regional-scope, normative-register, death-grammar, representation, anticipation, proportion-note, and manuscript-continuity audits. The earlier filename claiming V2 freeze was non-controlling and is superseded.

Chapter 31 — Against the Archic Fold, For Repair

Header

Freeze status: V3 — FINAL FREEZE after doctrinal, architectural, predecessor-provenance, death-grammar, repair, forgiveness, non-equivalence, differend, self-test, proportion-note, and Chapter 32 boundary audits. No prose was cut. The sole post-audit change was the authorised mechanical amendment of §31.9's proportion band from 9–11% to 9–12%.

31.9 The Self-Test, Ledger, and Transition

Proportion note. The ratified plan estimated §31.9 at 7–9%. The V2 plan itself expanded the section by requiring live operational questions, a concrete address inventory, attributable revision, and dated verdicts. The controlling band is therefore amended for this chapter to **9–12%**. No mandated self-test material is cut to satisfy the earlier estimate.

Chapter 32 — What Is the Common Owed?

Header

Freeze status: V3 — FINAL FREEZE after ratified-plan, provenance, lexical, empty-future-axis, foreclosure/lapse, personification-tier, legal-standing, scope-split, proportion, and Part VIII closure audits. No chapter prose was cut or substantively revised at freeze; only the drafting-status header was replaced.

32.3 The Grammatical Correction

Removed by join (flag 53): the sentence read “It is installed now, verbatim, as the Gate fixed it, and every section” and now reads “It is installed now, verbatim, and every section”.

32.4 Foreclosure

Removed by join (flag 54): the sentence read “The two distinctions the Gate assigned to this register” and now reads “The two distinctions assigned to this register”.

Scholion — The Missing Who: Heidegger and the Blocked Route

Header

Freeze status: V3 — FINAL FREEZE after ratified-plan, primary-text, quotation, bibliographical, lexical, status, proportion, and conclusion-boundary audits. The body preserves the audited V2 argument; the freeze operation corrects and completes the source apparatus, adds the bibliographical note, and removes all pending-verification language.

S.4 The Temporal Twin

Removed by join (flag 58): the sentence read “entered the doctrine at its own governance event, and this seat” and now reads “entered the doctrine, and this seat”.

S.5 The Missing Who

Removed by join (flag 59): the sentence read “The result, in the Gate’s words, its gloss inseparable:” and now reads “The result, its gloss inseparable:”.

Notes, [^c32.6]

Removed by join (flag 61): the sentence read “[^c32.6]: Doctrine v13.1 §2.4, the perimeter diagnosis, entered by the temporal-deixis articulation event recorded in the Series Cascade Ledger; executed here as one cited movement per the ratified plan.” and now reads “[^c32.6]: Doctrine v13.1 §2.4, the perimeter diagnosis.”.

Conclusion — The Hinge Does Not Command

Source: EO_VOL_I_CONCLUSION_V2_FINAL_FREEZE_2026-09-11.md (the frozen V2 Conclusion), not the superseded source-manuscript Conclusion at Ethical_Ontology_I.md lines 4929–4987.

Header

Freeze status: V2 — FINAL FREEZE, certified 11 September 2026 for the Reading Edition, after schema-concordance against the Vol I Plan v17, Chapter 32 citation, Chapter 22/23/27/28 citation, lexical, status, provenance, and closing-proposition parse audits. Two wording corrections were made at freeze and are listed in the certification record; no claim, status, or reservation was altered. The Volume III reservation at C.5 stands as written.

C.5

Parse (Terminology Act II, V21 §§1.1, 2.8): the closing proposition is a founding formula retained print-first. Its first sentence reads officially as: whatever obtains, obtains in a way; being is syncategorematic, the hinge collected in “ways of being”, and is not itself an obtainer.

Certification record

Certification record (apparatus; not part of the Reading Edition text)

Object. Conclusion — The Hinge Does Not Command, lines 4929–4987 of the frozen Volume I manuscript (mtime 26 July 2026), draft status V1.

Audits run, 11 September 2026.

1. *Chapter 32 Part-closure citations.* The Part question (“What is owed to each one, to the routes that keep a world, and to the common that no one owns?”) is verbatim at 32.8. The three-movement answer in C.2 is a faithful report of 32.8. “The common is what answers are about, never whom they are to” is verbatim at 32.3. C.1’s “owed nothing in its own name, its answerable carriage owed to the whos it carries” matches the 32.7 canonical. **One variance corrected:** C.2 printed “one postulate and no commands” as the Part’s closing; 32.8 prints “one postulate avowed, no commands”. Aligned to 32.8.
2. *Regional citations in C.4.* Chapter 22: “locushood does not wait on who-hood”, “a sign can say anything”, “generated avowal is not avowal” — verbatim, with C.4’s “was not established as avowal” a correct weakening to the negative result. Chapter 23: “route loss reaches access, never truth” — verbatim. Chapter 27: divine indices [O-T/O-M] — concordant. **One error cor-**

rected: C.4 stated “five indexed senses of still-there”; Chapter 28 (line 4272) yields *four* indices under which “Athena is still there” may be said and a *fifth, adjacent warranted fact* that she is newly addressed. Reworded accordingly.

3. *Closing proposition.* “Being is modal” places *being* in bare subject position, which Terminology Act II bars going forward while retaining founding formulas print-first under their official parse (as V21 §1.1 does for “Ontological modality is the way in which being obtains”). A parse note is added; the proposition is not rewritten.
4. *Schema concordance against the Vol I Plan (v17, Check/Vol 1 Plan.md).*

§9.2 canonical historical self-location: C.3 reproduces the plan’s sentence verbatim except at one clause. The plan states the distinctive contribution as “the finite manner obtaining as this who”; C.3 states it as “ownness as the differentia of the whole finite modal coincidence”. The variance is not drift: it is the ratified ownness/non-vicariousness office correction (Vol III Plan V10 record; V21 §4.1–4.2), and the manuscript’s wording is the one V21 governs. Certified concordant with the doctrine of record; the plan sentence is superseded at that clause.

Historical-modal sequence (plan §10): C.1’s four-clause sequence, open and perimetralisable from inception, disclosed as his without yielding localisation, interrupted and localised in the past, indelible having-been without totalisation or fulfilment, is the plan’s sequence with two body-sourced expansions (“living revision”, Ch. 17; “a truth’s standing, never a persisting thing”, Ch. 18); the terminal wonder-arrow discharges at C.4 as the plan’s §7.20 carries it. Concordant. **Closing proposition (plan §10):** C.5 is the plan’s proposition with six ratified additions, each traceable to a frozen chapter: “or deictically singular obtaining” (Chs. 4, 12); ownness as differentia with the coincidence “no other than someone” (Ch. 7; V21 §4.2); “the manner may recur; this own obtaining cannot be forwarded or repeated” (Chs. 6, 18); “Focus may intensify modalisation but never ownness” (Ch. 10); “the locus localises

answers in an obtaining already own” (Chs. 6, 13); “worth is disclosed, not derived; avowal creates neither worth nor own-ness” (Ch. 29). No clause of the plan’s proposition is dropped. Concordant, extended.

5. *Lexical*. No retired term (standing availability, keystone, operative opposition, more transparent, replaceability) occurs. “forced” and “proved” occur once each in non-technical senses; “irreducibility” occurs in historical description only.
6. *Status*. No [O] moved; no new [H]; the machine asymmetry, the unowed derivation of worth, and the wonder question stand as written.
7. *Provenance*. The V1 draft header referred to “Conclusion Plan V2”, “governance G and K”, and “§9.2 self-location”. These are apparatus references and are removed from the Reading Edition header; they remain in this record.

Concordance note for the second-edition appendix (not an edit). C.5 reserves to Volume III “whether the ontological difference itself can be restated from the plural ways in which being obtains.” Since freeze, *The Three Differences and the Sense of Being* (16 August 2026, §8) has proposed that restatement under a printed defeater, and V21 §9.4 states the ontological difference as what obtains / HOW it obtains. The reservation stands as the frozen text; the appendix records that Volume III now receives the historical question, not the restatement itself.

Owed before the Reading Edition freezes as a whole: authorial ratification of corrections 1 and 2; hash of this Conclusion text into the Reading Edition freeze record. The C.3 plan-source question is closed: the plan is Check/Vol 1 Plan.md (v17), and the concordance is certified above.

Change List

Pass 1 (11 September 2026): closed classes

- **Status headers** moved, 14 in the first edition (source lines 1884, 2105, 2253, 2415, 2547, 2643, 2831, 2999, 4344, 4484, 4610, 4729, 4845, 4931) and the V2 Conclusion’s own header; each printed above under its chapter.
- **Bracketed editorial notes** moved, 5: notes c2.4 and c2.5 (Chapter 2), c8.4 twice (“[verify page loci against the cited editions]”, “[Rayo and Yablo: work not yet named — open]”), Chapter 25 §25.6 (“[correction carried on the load-bearing sentence]”).
- **Citation substitution**, 13 occurrences: “*Positive No-Ground* is an unpublished manuscript; its version and date are to be fixed at freeze.” → “*Positive No-Ground: The Common and the Locus of Answerability* (Institute for Ethical Ontology, 2026), DOI 10.5281/zenodo.21628405.”
- **Joins**, 4, all in Chapter 2 §§2.5 and 2.7, removing drafting-history phrases; printed under Chapter 2 above.
- **Conclusion**: taken from the V2 freeze of 11 September 2026, whose two wording corrections and certification record are printed under Conclusion above.

Pass 2 (12 September 2026): itemised

1. **Join** (flag 1a), Chapter 9 – The Common Without a Bearer: Carried, Not Stored, §9.8 The Ledger, and the Border Ahead. Before: “– ratified in the closed research programme and realised in this chapter’s prose;” After: “– realised in this chapter’s prose;”
2. **Join** (flag 1b), Chapter 9 – The Common Without a Bearer: Carried, Not Stored, §9.8 The Ledger, and the Border Ahead. Before: “– likewise research-ratified and here manuscript-earned,” After: “– here manuscript-earned,”
3. **Join** (flag 2), Chapter 10 – Modulation, Modalisation, and Freedom, §10.9 The Ledger, and Part III Closed. Before: “as presently disclosed – closed-research-ratified and here realised; and” After: “as presently disclosed; and”
4. **Join** (flag 6), Chapter 12 – Categorially Singular, Not Self-Grounding, §12.8 The Ledger, and the Three Confusions. Before: “The definition: **[F]**; revision-ratified, manuscript execution completed in this chapter.” After: “The definition: **[F]**.”
5. **Join** (flag 12), Chapter 17 – The Other’s Death: Interruption, Perimetralisation, and Inaccessible Localisation, §17.7 Death, Stated. Before: “said otherwise, it is the retired vocabulary and the audit removes it.” After: “said otherwise, it is the retired vocabulary.”
6. **Join** (flag 26), Chapter 22 – The Machine, §22.9 The Ledger, and the Turn to the Dead. Before: “implements that gate with two plan-ratified refinements” After: “implements that gate with two refinements”
7. **Join** (flag 28), Scholion – The Second Tomb: When a Claim of Passage Is Kept in a Town, §S.6 The scholion’s result. Before: “receives the anthropological and the Christological trials, with the assigned packet.” After: “receives the anthropological and the Christological trials.”

8. **Join** (flag 31), Scholion — The Second Tomb: When a Claim of Passage Is Kept in a Town, §24.8 Reading Without Verdict. Before: “Held at candidate status, packet-governed, reported and stratified but not admitted” After: “Held at candidate status, reported and stratified but not admitted”
9. **Join** (flag 32), Chapter 27 — Theology at the Boundary, §27.2 What the Reading Brings. Before: “the created-routes clarification, still a packet position, still unadmitted, still riding” After: “the created-routes clarification, still unadmitted, still riding”
10. **Join** (flag 53), Chapter 32 — What Is the Common Owed?, §32.3 The Grammatical Correction. Before: “It is installed now, verbatim, as the Gate fixed it, and every section” After: “It is installed now, verbatim, and every section”
11. **Join** (flag 54), Chapter 32 — What Is the Common Owed?, §32.4 Foreclosure. Before: “The two distinctions the Gate assigned to this register” After: “The two distinctions assigned to this register”
12. **Join** (flag 58), Scholion — The Missing Who: Heidegger and the Blocked Route, §S.4 The Temporal Twin. Before: “entered the doctrine at its own governance event, and this seat” After: “entered the doctrine, and this seat”
13. **Join** (flag 59), Scholion — The Missing Who: Heidegger and the Blocked Route, §S.5 The Missing Who. Before: “The result, in the Gate’s words, its gloss inseparable:” After: “The result, its gloss inseparable:”
14. **Join** (flag 20), Chapter 19 — The Need We Cannot Meet: Presence, Mourning, and the Lost Key, §19.8 Closing Part V. Before: “**Thesis 14, manuscript-executed here**, with its who/locus preamble and total-loss clause: research-concordant and certified at Part V freeze against Research Dossier v22.” After: “**Thesis 14, manuscript-executed here**, with its who/locus preamble and total-loss clause.”

15. **Join** (flag 22), Chapter 19 — The Need We Cannot Meet: Presence, Mourning, and the Lost Key, §19.8 Closing Part V. Before: “operated on this book’s ground; manuscript-executed and research-certified at Part V freeze, with the packet confirming that traces may sustain reference and warrant without delivering the perimetralised life or its localisation.” After: “operated on this book’s ground; manuscript-executed.”
16. **Join** (flag 23), Chapter 19 — The Need We Cannot Meet: Presence, Mourning, and the Lost Key, §19.8 Closing Part V. Before: “the claimant symmetry’s first station discharged, and the three chapters’ provenance entries jointly certified against Research Dossier v22 at the Part’s freeze.” After: “the claimant symmetry’s first station discharged.”
17. **Join** (flag 61), Scholion — The Missing Who: Heidegger and the Blocked Route, §Notes, [^c32.6]. Before: “[^c32.6]: Doctrine v13.1 §2.4, the perimeter diagnosis, entered by the temporal-deixis articulation event recorded in the Series Cascade Ledger; executed here as one cited movement per the ratified plan.” After: “[^c32.6]: Doctrine v13.1 §2.4, the perimeter diagnosis.”
18. **Move** (flag 14), Chapter 17 — The Other’s Death: Interruption, Perimetralisation, and Inaccessible Localisation, §17.8 The Ledger, and What the Perimeter Leaves Standing. Moved whole to this volume: “Regional entry manuscript-executed here and research-certified at Part V freeze against Research Dossier v22: the governing post-closure correction confirms mediated access through the other’s living presence, inaccessible localisation, loss of the living access-condition at death, and the possibility-not-impossibility rule.”
19. **Move** (flag 17), Chapter 18 — Two Permanences: Indelible Having-Been and the Manner That May Recur, §18.8 The Ledger, and the Need Ahead. Moved whole to this volume: “Research-certified at Part V freeze against Research Dossier v22: the corrected conditional non-restoration axiom is ex-

plicitly grounded in irreversible interruption and definitive perimetralisation, while remaining a conditional analytic consequence rather than a proof of singularity.”

20. **Move** (flag 18), Chapter 18 — Two Permanences: Indelible Having-Been and the Manner That May Recur, §18.8 The Ledger, and the Need Ahead. Moved whole to this volume: “Proposed regional entries, manuscript-executed here, pending packet confirmation at freeze.”
21. **Move** (flag 21), Chapter 19 — The Need We Cannot Meet: Presence, Mourning, and the Lost Key, §19.8 Closing Part V. Moved whole to this volume: “The packet supports the posthumous-reference, warrant, trace-access, inaccessible-localisation, and non-restoration distinctions; the canonical itself remains manuscript-earned rather than externally derived.”
22. **Move** (flag 48-49), Chapter 31 — Against the Archic Fold, For Repair, §31.9 The Self-Test, Ledger, and Transition. Moved whole to this volume: “**Proportion note.** The ratified plan estimated §31.9 at 7–9%. The V2 plan itself expanded the section by requiring live operational questions, a concrete address inventory, attributable revision, and dated verdicts. The controlling band is therefore amended for this chapter to **9–12%**. No mandated self-test material is cut to satisfy the earlier estimate.”
23. **Addition** (note c29.1), Chapter 29 — Ognuno a Modo Suo, §29.1: marker [^c29.1] after “announces as complete.”; note text as printed.

The addition of note c29.1 is the one piece of text in the Reading Edition that is not the first edition’s; it explains the phrase *the frozen record* and was authorised by the author on 12 September 2026. The front matter (Imprint and Deposits; How to Read This Edition) is new to this edition.
